SKILLS

React Native CLI, Next JS, Typescript, React, Javascript, Expo, Redux Toolkit, Tailwind CSS, SCSS, Bootstrap, Express, MongoDB, Firebase, RTKQuery, Flutter

PROJECTS

PalmR8D - React Native CLI 🔗

- Developed the **CoCreator** role feature to upload weekly top 10 leaderboard businesses, helping users discover the best local businesses.
- Integrated in-app advertising, implementation of feed-based ads, banner ads, and interstitial ads to monetize the PalmR8D app.
- Integrated real-time in-app messaging with unread message counts and dynamic chat list reordering using Firebase Realtime Database (RTDB)
- Implemented real-time push notifications using Firebase Cloud Messaging, handling foreground, background, and inactive app states, with deep linking to navigate users to the relevant screens on notification click
- Integrated **post and profile sharing** through universal links and app links.
- Integrated phone OTP and email verification into the signup flow using Firebase Authentication to ensure secure user onboarding
- Implemented a centralized logging system to track and monitor user actions across the app for better debugging and analytics

Atto App - Expo 🔗

- Sign up using Google or manually with email/password for quick and secure access.
- Flexible Booking System Choose from a variety of services and book your preferred time slot and Supports pre-booking for future dates, ensuring hassle-free planning.
- Integrated with Firebase Cloud Messaging (FCM) to deliver instant updates on bookings, reminders, and service status.
- OTA (Over-the-Air) Updates, Stay up-to-date without needing to download new app versions — all enhancements pushed in real-time.
- Location-Based Service Access- The app smartly checks if your location is within the serviceable zone. Only eligible users can proceed with bookings — ensuring optimized logistics.
- Admin Dashboard- Powerful admin panel to manage bookings, monitor users, and send broadcast notifications.

WebBook - MERN 🔗

- Developed an engaging UI landing page using GSAP for a dynamic user experience.
- Implemented CRUD functionality for users to manage their notes, MCQs, tasks, questions, and posts.
- Used **Socket.IO** 🔗 to enable real-time notifications whenever someone interacts with posts or global cards.
- Leveraged Firebase FCM push notifications to alert users when offline, with notifications saved in the database.
- Fully responsive website optimized for desktops, tablets, and mobile devices.
- Added request rate limiting to enhance security and performance.
- Configured daily checks on the database for notifications and automated email reminders using cron jobs.
- Used BeeFree service for creating custom email templates, sent for welcoming new users and setting task reminders.

EDUCATION

Bachelor in Computer Application, *Lovely Professional University*	present
12th Global Presidency School	80%
10th Sunbeam School Suncity	86%

ACHIEVEMENTS

Across The Globe - Internship Frontend Development	07/2024 – 02/2025
Chordify App Development Trainee	05/2025 – 01/2026
