PROJECTS

Hirehub - Integrated Job & Social Media app 03/2024 – present
- Added a job management feature that lets employees create, delete, and update jobs. Job seekers can search for jobs and view details. Only employees can post jobs.
- Applicant can submit applications or upload their resumes for jobs.
- Added social media features such as sending friend requests, posting updates, liking and commenting on posts, viewing user profiles, and updating profiles with form validation using React Hook Form.
- Added a blog feature that allows users to create, read, update, and delete blogs.
- Added login and sign-up features with protected routes.
- Integrated Razorpay for premium features; only premium users have access to certain features.
- Improved UI/UX and made the design responsive using Tailwind CSS.

Aryazon - MERN stack Ecommerce app 09/2023
- Developed an eCommerce website where users can search and browse various products, place orders, and choose between card or cash on delivery. The site also displays related products.
- Added wishlist ,product comparison and liked products options for user convenience.
- Implemented voice-enabled product search using Web Speech API with infinite scroll and added pagination features for efficient navigation
- Enhanced cart functionalities, allowing users to change quantities after adding items to the cart.
- Implemented password recovery with bcrypt secure token generation for verification during password changes.
- Developed an Admin Panel where admins can manage orders, update order statuses to pending, delivered, or canceled, adjust product pricing and quantities, delete products, and grant admin privileges to users.

AryaLingo - Translator App 03/2024
- Developed engaging interactive quizzes where users can check multiple options one at a time.
- Added flexible language selection for learning; users can choose any language, and the app displays 10 random words with native translations and pronunciations.
- Created a translator feature where users can input a sentence in any language and receive a translated sentence in the selected language
